DATA ENGINEER

I am passionate about launching my career as a **Data Engineer**. Your Data Engineer opening provides an excellent fit for my qualifications and desires, and I hope to have the chance to interview for this position.

In addition to my academic achievement. I have also participated in various competitions of competitive programming, recognized by professors, colleagues, and peers as personable, including **Extract, Transform, and Load** data from source systems to **Azure Data Storage** services using a combination of **Azure Data Factory**, **PySpark**, **Spark SQL, and Azure Databricks**. **Data ingestion** to one or more **Azure Services (AzureData Lake, Azure Storage, Azure SQL)** and processing the data in **Azure Databricks**

I have experience as a **Data Engineer** and have also worked on **data visualization** for creating reports according to clients' requirements. I have worked on **data-driven technology** for **3.7+ years in Webhelp and Extension Technology**.

I thrived in this fast-paced, client-centered setting. My trainer always called me, **"If we have data, let's look at the data. If all we have are opinions, let's go with mine"** because of my willingness and participation in projects assigned by them.

I perceive that this is a unique opportunity to join the data analyst team that has generated beneficial reports for the development and growth of the company, and I would like to contribute my work to be part of your continued success. Please call me at **+919873788393** or email **sukumar8393@gmail.com** to arrange an interview.

I look forward to hearing from you.
