I am passionate about launching my career as a **Data Scientist**. Your entry-level **analyst** opening provides an excellent fit for my qualifications and desires, and I hope to have the chance to interview for this position.

In addition to my academic achievement. I have also participated in various competitions of competitive programming, recognized by professors, colleagues, and peers as personable, including **Data Analytics Technique (EDA), Visualization Tools, All Machine Learning Algorithms (Regression and Classification Techniques), and Deep Learning Techniques (Classification and Recognition).**

I have experience as an **Azure Data Engineer** and have also worked on data visualization for creating reports according to client's requirements through **3.6+ years in WebHelp and Extension Technology**.

I thrived in this fast-paced, client-centered setting. My trainer always called me, **"If we have data, let's look at the data. If all we have are opinions, let's go with mine"** because of my willingness and participation in projects assigned by them.

I perceive that this is a unique opportunity to join the data analyst team that has generated beneficial reports for the development and growth of the company, and I would like to contribute my work to be part of your continued success. Please call me at **+919873788393** or email **sumit.datascientist@gmail.com** to arrange an interview.

I look forward to hearing from you.
